

**Deutsches
Rundfunkarchiv**

Stiftung von ARD und Deutschlandradio

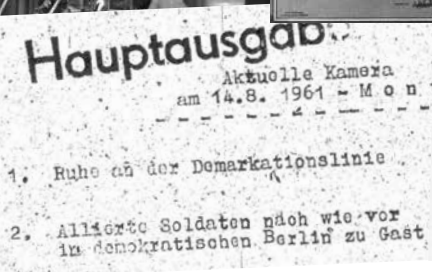

English

The German Broadcasting Archive (DRA) is a joint institution of the ARD and Deutschlandradio. It is a charitable foundation under civil law, with locations in Frankfurt am Main and Potsdam-Babelsberg.

The comprehensive collection includes analogue and digital sound and picture documents, documentary records, printed media and historical objects. The archive encompasses significant parts of the audio-visual tradition in Germany and reflects the development of German broadcasting before 1945 as well as radio and television of the former GDR.

The DRA was founded in 1952 as the »German Broadcasting Sound Archive« and renamed the German Broadcasting Archive in 1963 following constant expansion of its responsibilities. In 1994, the former GDR's radio and television broadcasting archive was incorporated into the Berlin location, today Potsdam-Babelsberg.
